

Chutes & Adapters

maintaining the integrity of fresh

STANDARD CHUTE

Chute runs down the middle of the trailer's ceiling blowing large quantities of cold air from the reefer unit to the back of the trailer.

- Special adapters are not required.

CHUTES:

Available in 4 material options:

- Woven Polyethylene (PE)
- Coated Vinyl
- Coated Nylon
- Mesh

TWO FINGER CHUTE

Ideal for providing uniform temperature throughout the trailer.

- Helps to prevent damage that can be caused by forklifts going down center of trailer.
- Special adapters are not required.
- Available in 20" and 30" fingers.

TUBE CHUTE

Ideal for preventing damage while loading and unloading.

- Hangs in the crease between the ceiling and wall to prevent damage from forklifts and boxes.
- Hangs flush to the wall when not in use.
- Moves air directly to the back of the trailer.
- Must use with the Unimax-Tube or Pop-Up adapter.

Chute configurations:

Standard:

- Oblong grommets header
- Round grommets length

Optional:

- Velcro - all around, length only, header only, last 10' and other configurations
- Twist Fasteners - all around

Fasteners:

Nylon Drive Rivets #2011

Nylon Twist Snaps #2898

Nylon Spacers #2202

Velcro for ceiling #2023

Standard Center Chute with Unimax Adapter.

Two-Fingered Chute with Standard Adapter.

Chutes & Adapters

POP-UP ADAPTER

Universal fitting to all refrigeration units

- Virtually eliminates air chute damage caused during loading.
- Adapter automatically slides up to the ceiling preventing costly tears and punctures.
- Great for non-refrigerated backhauls - allows trailer to be loaded to maximum cube.
- Can be used with the Center Chute, Two-Finger Chutes and The Tube Chute.
- Quick and Easy Installation
- Lift-n-Lock option.

UNIMAX - UNIVERSAL ADAPTER

Fits virtually every reefer design

Use with the Center Chute

- High impact molded plastic adapter protects evaporator from damage .
- Reduces fluttering, thereby decreasing chute delamination.
- Increased air flow.
- Quick and easy installation - Innovative one-piece design combines chute header and adapter.
- Installs in 15 minutes or less.
- Reduces the run-time of the refrigeration unit.
- Eliminates multiple chute and adapter configurations between different trailers.
- Sleek design - Chute body fits to the Unimax Adapter with Hook and Loop to provide a sleek finished appearance. Low profile.

UNIMAX - TUBE

Use with the Tube Chute

- Same feature as the Unimax, but built specifically for the tube chute.

STANDARD ADAPTERS

#A9642 Thermo King Units

#A9658 Carrier Units

#3190 Thermo King Precedent
