

Duromax Installation Instructions- Top & Bottom Quick Release

Step One: Bottom Quick Release Brackets

Locate center line of trailer. Install bulkhead support brackets (part# 2015) on the front wall along floor 35" out from the center line using two each hex head screws included with kit.

Step Two: Placement of Bottom Section

Place the lower bulkhead section into the 2 bulkhead support brackets and position bulkhead against the front wall of the trailer.

Step Three: Installation of Quick Release Latches

Locate the two cut-outs on the bottom section, cut away tab. Place the latch in the cut-out and secure with the provided self tapping sheet metal screws into the front wall unit side post. When installed, turn the latches to secure the bottom section against the front wall of the trailer.

Step Four: Placement of top section

Position the top section at a 45 degree angle on top of the bottom section to engage the three locking tabs. Tilt the top section back into position.

Step Five: Installation of Quick Release Latches

Locate the two cut-outs on the top section. Place the latch in the cut-out and secure with the provided self tapping sheet metal screws into the front wall unit side post. When installed, turn the latches to secure the top section against the front wall of the trailer.

Note:

Over 104" high requires Center Support #10175-H
Quantity = 2
