## Available Options

### Fan Kit

As an alternative to a rear evaporator, the Two-Temp Fan Kit allows temperature control in the second compartment. Specifications include: 10" diameter; 10 prong blade; 12 volt, 6000 hour brush life motor; displacement of 650 CFM; temperature range from -40° F to +80° F, and an On/Off switch.

### Vent Kit

10" Diameter Vent with Adjustable Velcro Flap provides controlled air flow to rear compartment or return air flow when installed with a Fan Kit.

### E or F Straps

Installed with flush mounted hardware and comes with a UHMW abrasion guard to protect against premature wear from the track.

**Optional: Customized Wheel Well cut out – inserts with velcro**
